PROFESSIONAL SUMMARY

Software Developer (B.E. Computer Science, CGPA 8.6/10, May 2026) with a strong foundation in Data Structures & Algorithms, OOP, and System Design, and hands-on experience across Java, Python, React.js, and SQL. Built and deployed 4+ production-grade applications, including a blockchain-based voting platform and a real-time collaboration platform with WebSocket-driven features and AI integration, following Agile/Scrum practices with unit testing and code reviews. Published a research paper at SERB/ICAMT and ranked Top 12 of 500+ teams at a National Women's Hackathon. Seeking a Software Developer role to design and build reliable, scalable software systems.

TECHNICAL SKILLS

Core CS: Data Structures & Algorithms, OOP, System Design Basics, DBMS, REST API Design

Languages: Java, Python, JavaScript, HTML5, CSS3

Frameworks: React.js, Django, Flask, Node.js, Flutter

Databases: SQL, MongoDB Atlas, Firebase Firestore

Tools & Platforms: Git/GitHub, Docker, VS Code, Android Studio, Figma

Practices: Agile/Scrum, Unit Testing, Code Reviews, CI/CD basics, Blockchain Fundamentals

PROFESSIONAL EXPERIENCE

Full Stack Development Intern — Besant Technologies

Jan 2026 – May 2026

- Engineered 3+ end-to-end features (authentication, CRUD, responsive UI) using React.js, Python REST APIs, and SQL, cutting manual QA effort by ~25-30%
- Designed and integrated 10+ RESTful API endpoints with a React frontend, ensuring reliable data flow under concurrent user actions while collaborating in an Agile team environment

Frontend Development Intern — Six Sigma Solutions

Nov 2025 – Jan 2026

- Built a responsive corporate website frontend for an AR/VR client using React.js — developed reusable components, implemented JWT-based authentication, and delivered About & Contact Us pages with secure session handling

Full Stack Development Intern — NoviTech R&D

Jan 2024 – Feb 2024

- Built web application modules using HTML, CSS, JavaScript, and Python within Agile sprints, participating in sprint planning, standups, and peer code reviews

PROJECTS

OneTap — Blockchain-Based Voting System — React.js, Node.js, Blockchain, SQL

- Designed a tamper-proof digital voting platform using blockchain principles for immutable vote records; built a Python backend with real-time Firebase voter authentication
- Presented system architecture at a National Conference on emerging technologies
- Live demo: one-tap-votechain.netlify.app

StudySphere — Real-Time Collaboration Platform — React.js, FastAPI, PostgreSQL

- Designed and deployed a full-stack platform with WebSocket-driven chat/whiteboard, JWT authentication, and Google Gemini AI study features, achieving sub-100ms latency across 10+ concurrent users
- Live: studysphere-tan-rho.vercel.app

ParkMe — Parking Slot Finder and Booking System — React.js, Python, SQL

- Built a parking slot booking system with a Python backend and SQL schema design to handle real-time availability and prevent double-booking conflicts
- GitHub: github.com/Akshayakumar0207/park_me

CERTIFICATIONS

Full Stack Python (Basant Technologies, 2026) • Cloud Architect Trainee (AWS Academy, 2025) • Programming in Java (NPTEL, IIT Kharagpur, 2024) • Core Java (Stack Queue Institutions, 2024) • UI/UX Design (IBM SkillBuild, 2024) • Flutter Development (Gateway Solutions, 2025)

ACHIEVEMENTS & PUBLICATIONS

- Published research paper on blockchain-based voting systems at SERB-funded ICAMT national conference
- Ranked Top 12 out of 500+ teams at a National Women's Hackathon; built a working prototype under strict time constraints
- Participated in 3 national-level hackathons, delivering functional end-to-end prototypes
- Active on LeetCode: leetcode.com/u/AkshayaMIT/

EDUCATION

B.E. Computer Science & Engineering — Mahendra Institute of Technology, Salem

May 2026

CGPA: 8.6 / 10

HSC — Govt. Girls Model School (83%) | SSLC — Govt. Girls Model School (78%)
